HISTORY AND PHYSICAL

Patient Name: Kleinberg, John
Admitted: 09/09/2008

RM#: BMSUB111W
MR#: 20008474

SERVICE: Dr. Maro, Dr. Todt, and Dr. Schiller.

PRIMARY CARE PHYSICIAN: Dr. Heck.

CHIEF COMPLAINT: Chief complaint is intoxication and reporting that he wanted to kill himself.

HISTORY OF PRESENT ILLNESS: The patient is a 44-year-old gentleman unfortunately who has severe alcoholism. He also has some chronic back pain. He has been drinking heavily, he says 18 cans of beer a day for several days. He told his neighbor who is a police officer, "Can I borrow your gun, I want to shoot myself." His neighbor called other authorities and he was brought into the emergency room. He now reports that it was just a joke. He was kept in the emergency room because his alcohol level was greater than 300. He is now rapidly starting to get some shakes, seems to be having alcohol withdrawal symptoms already, and he is admitted to the hospital for this and for this report of suicide wishes.

PAST MEDICAL HISTORY: Positive for hepatitis C and chronic back pain and alcoholism.

ALLERGIES: No known drug allergies.

HOME MEDICATIONS: None.

SOCIAL HISTORY: He drinks heavily. Reports that he does not smoke.

PHYSICAL EXAMINATION: VITAL SIGNS: His blood pressure is 160/92, heart rate is 101. His heart rate had gone up to 130 in the ER. HEENT: Exam is normal. LUNGS: Clear. CARDIAC: Tachycardic. ABDOMEN: Benign without hepatosplenomegaly. EXTREMITIES: There is no edema. NEUROLOGIC: Neurologic exam is intact. He is definitely shaky and moving his legs a lot and a little bit tremulous.

LABORATORY STUDIES: Other labs and his tox screen are all negative. Urinalysis is clean. EKG has a lot of baseline artifacts and the tremor is otherwise normal. Significant labs - liver tests, ALT and AST are 69 and 51, BUN and creatinine are 6 and 1. White count 4.7.

ASSESSMENT AND PLAN:

1. Assessment and plan is that of alcohol withdrawal. I am going to put him on some phenobarbital plus p.r.n. Ativan, some Nexium, and the tele monitor. Tachycardia is noted. We will follow him on the Phenobarbital and the Ativan and treat accordingly. He is getting put on the tele monitor now and will decide about a beta blocker.

MR#: 20008474

2. Suicidal ideation. I am not sure if this was real or not. It sounds like he may have been intoxicated and when he sobers up, he may get a better story and perhaps we will be able to get him go home. We will have the psychiatrist assist us with the interviews.
3. Hepatitis C. His LFTs a little bit elevated. I counseled him about the dangers of drinking alcohol with hepatitis C.

SPINE CERVICAL 2-3 VIEWS**Oct 01, 2008 16:04**

PROCEDURE: BDX2040 - SPINE CERVICAL 2-3 VIEW

ORDERING DOCTOR: LUDWIN, FREDRIC M.D.

DATE OF EXAM: Oct 1 2008 4:04PM RIS ORDER NO: 90001 CPT: 72040

HISTORY: Trauma.

FINDINGS: Three views of the cervical spine were obtained. The study is limited because the patient was not able to cooperative fully. Anterior osteophytes, disc space narrowing are seen at C4-C5 and C5-C6 consistent with moderate degenerative changes. On the basis of the three views, the vertebral bodies are normal in height and normally aligned. The spinous process alignments are intact and normally aligned.

Incidental finding, there are atheromatous changes of the left common carotid artery.

IMPRESSION: Limited study. Degenerative changes. No fracture.

Atheromatous changes left CCA.
